Versatile, White .....	30
Miscellaneous .....	31-32
Gehl .....	31
Cat/Lexion .....	31
Challenger .....	31
Co-Op .....	31
Hart-Carter .....	32
Owatonna .....	32
Replacement Part .....	32

## Crop Lifters and Guards

### Fits All Makes

Schumacher Crop Lifter.....	33-34
Schumacher Pro Flex Crop Lifter .....	35-36
Universal Grain Lifter .....	36
Schumacher Pro Flex Hardware Guide.....	37
Gateman Crop Lifter .....	38-39
Mckay "Stubby" Crop Lifters .....	40-41

## All Make Guards

## Guards

At harvest time, farmers want to be confident that their equipment is not going to break down. At Westward, our guards are tried and true, based on many years of use in the field. Our guards are heat treated to meet customer expectations of hardness and toughness so they do not bend, break or wear prematurely. Experience has proven this year after year.

**Schumacher Easy Cut (ECII) Guards**

In the last decades, two types of double guards became dominate in the market: the forged guards and the Schumacher steel guard.

What makes the SCH Easy Cut steel guard so special? The SCH Easy Cut guard is manufactured using a special alloy steel. A subsequent special hardening process gives the guard extremely high hardness, durability, and wear life. Another advantage is the much higher vertical and lateral strength of the guard. No guard lips break off; guards don't bend.

The angled cutting edges of the guard hold the crop material better, resulting in a cleaner cut and a better flow of the material. This also results in less power needed to cut the material.

**Blunt Point**  
less spearing of crop and residue

**Increase Stability**  
guard is bolted on top and bottom of cutterbar, increasing the durability against all impact

**Top & Bottom Cutting Edge**  
double cutting edges for balanced knife guidance

**Smooth Knife Movement**  
design of guard makes it possible to insert knives with connector bars already mounted

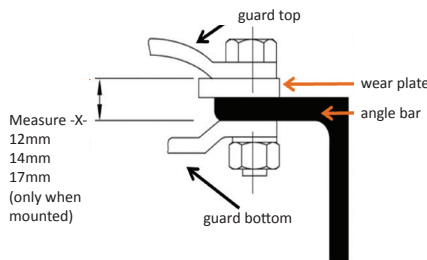

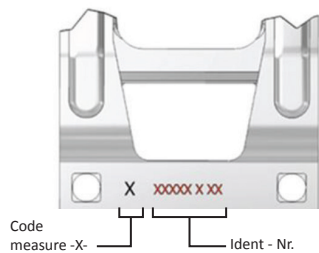

**Benefits:**

- Slightly closed skeleton construction
- Higher vertical + lateral stability
- No further adjustments necessary after mounting
- Double bevelled edges, better guidance of knife

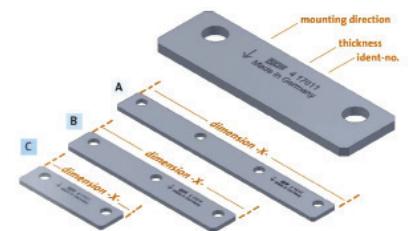

**Mounting Instructions**

Dimension -X- Mounting dimension determines type of guard and thickness of spacer plate.

**Identify Your Guard**

**Wear plate**

Mark	Guard Type	Guard Color
2	12mm	black
4	14mm	red
7	17mm	gray

Backbone	+	Wear Plate/Spacer Plate	= Dimension X
6mm	+	6mm	= 12mm
9mm	+	5mm	= 14mm

## Schumacher Easy Cut (ECII) Guards

### Standard Guard

#### SCH 12MM 2-PT

Fits SCH EasyCut systems installed on AGCO-Gleaner, Series III, 300, 500, 8000 & 8200. John Deere, 200, 900, 900F, 900R, 600F & 600R series. All Honey Bee platforms.

#### SCH 14MM 2-PT

Fits SCH EasyCut systems installed on AGCO-Gleaner, Series I & II. CaseIH, 810, 1010 & 2020. Hart-Carter. Love Bars. New Holland 970, 972, 973 & 74C. Massey Ferguson, Floating, & 9100 Flex.

#### SCH 17MM 2-PT

Fits SCH EasyCut systems installed on CaseIH, 820 & 1020. Also used on many brands of Mower Conditioners and Sickle bar mowers.

### Open-Top First Guard

#### SCH 12MM OPEN TOP

Fits SCH EasyCut systems installed on AGCO-Gleaner, Series III, 300, 500, 8000 & 8200. John Deere, 200, 900, 900F, 900R, 600F & 600R series. All Honey Bee platforms.

#### SCH 14MM OPEN TOP

Fits SCH EasyCut systems installed on AGCO-Gleaner, Series I & II. CaseIH, 810, 1010 & 2020. Hart-Carter. Love Bars. New Holland 970, 972, 973 & 74C. Massey Ferguson, Floating, & 9100 Flex.

#### SCH 17MM OPEN TOP

Fits SCH EasyCut systems installed on CaseIH, 820 & 1020. Also used on many brands of Mower Conditioners and Sickle bar mowers.

### Open-Top Center Guard

#### SCH 12MM CENTER

Fits SCH EasyCut systems. This center guard is used only on Double Drive platforms.

#### SCH 14MM CENTER

Fits SCH EasyCut systems. This center guard is used only on Double Drive platforms.

#### SCH 17MM CENTER

Fits SCH EasyCut systems. This center guard is used only on Double Drive platforms.

### Triple Guards

#### SCH 12MM 3-PT

Fits SCH EasyCut systems installed on AGCO-Gleaner, Series III, 300, 500, 8000 & 8200. John Deere, 200, 900, 900F, 900R, 600F & 600R series. All Honey Bee platforms.

#### SCH 14MM 3-PT

Fits SCH EasyCut systems installed on AGCO-Gleaner, Series I & II. CaseIH, 810, 1010 & 2020. Hart-Carter. Love Bars. New Holland 970, 972, 973 & 74C. Massey Ferguson, Floating, & 9100 Flex.

#### SCH 17MM 3-PT

Fits SCH EasyCut systems installed on CaseIH, 820 & 1020. Also used on many brands of Mower Conditioners and Sickle bar mowers.

Center Guard 17mm Open Top	CUT10639.01	CUT16469.01
Standard Guard 12mm w/ Cut-Out	-	CUT16538.01

All Easy Cut I and Easy Cut II guards are interchangeable.

Easy Cut II guards have been shortened compared to the Easy Cut I version. With this changes, the tips of the Easy Cut II guards are more blunt, reducing the risk of spearing the crop

- Guards should be checked regularly for wear.
- A new guard will have a gap of 0.15" - 0.17" (3.8mm - 4.2mm).
- Gaps worn over 0.21" (5.4mm) start causing the knife to float. The rounded cutting edges will also require greater power requirements from the knife drive.

CUT18010

Schumacher Easy Cut guards hardly ever break. The wear of guards has to be checked with the Easy Cut MultiTool.

**Fits All Makes**

**Schumacher Crop Lifter**

The Schumacher crop lifter is available to suit most finger guards. They are quick and easy to fit, increasing machine and operator efficiency at the peak of harvest. Height and/or angle adjustment is achieved quickly and easily by repositioning the spring clip to one of the three operating positions.

**Height-adjustable lifters with quick change feature.**

All the Schumacher crop lifters pictured here are made of heat-treated spring steel with 5mm thick bottom runners. The riveted guard pocket clamps the guard on both sides and thus gives the lifter excellent lateral stability. This is absolutely essential when turning in lodged crops. The locking clip can secure the crop lifter at three different heights. This is particularly important when working in conditions that alter the angle of the cutter bar. A spool nut secures all three crop lifter types. Our unique mounting bracket allows the crop lifter to be put on or taken off in seconds.

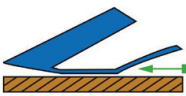

AS - Standard Series  
We recommend this type for normal harvesting conditions.

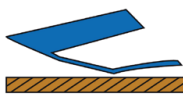

SK - Special Series  
A crop lifter for difficult harvesting conditions.

**Correct Mounting**

Correct position

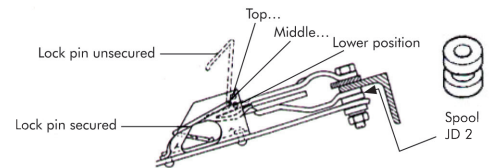

Incorrect position  
The crop lifter "climbs"

Incorrect position  
The crop lifter "digs"

The illustration above shows a crop lifter attached to the guard of an Easy Cut II variable cutting system. The lock pin can be placed in either of the three holes, each resulting in a different angle of the lifter. In addition two more positions can be obtained by placing the flat washer between the guards and mounting spool.

**Note:** For Crop Lifters to work properly, the bottom runner must be parallel to the ground when the platform is in cutting position.

Westward Parts can source many other special order items that are not listed in this catalogue, please visit our website at [westwardparts.com](http://westwardparts.com) or call us directly at 1-888-937-7278-. Our team will help you find what you need.

The product images shown are for illustration purposes only and may not be an exact representation of the product.

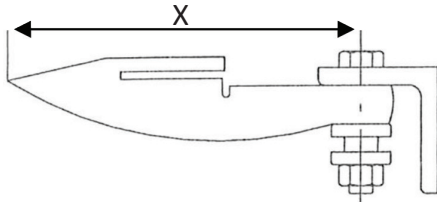

## Fits All Makes

## Schumacher Crop Lifter

### What Size Crop Lifter is Right for You?

To find the size of crop lifter for your needs, please measure the distance from the center of the guard bolt hole to the tip of the guard; and you can select a lifter from list below.

\* All crop lifters must be checked once fitted for correct alignment prior to use.

Distance "X" From/To	Crop Lifter Model
138-146mm / 5.4-5.8"	AS-100/5, SK-205
145-153mm / 5.7-6.0"	ASX-100, SK-212
154-163mm / 6.1-6.4"	ASX-120, SK-220
164-170mm / 6.5-6.7"	ASX-127, SK-227

**Fits All Makes**

**Schumacher Pro Flex Crop Lifter**

Schumacher pulse crop lifters combine Pro Flex simple design with durability for your easy pulse crop harvest:

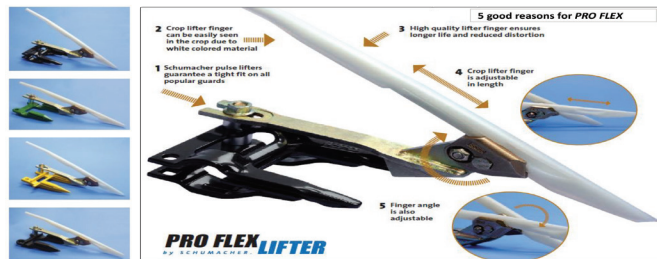

- compact design and easy mounting
- guarantees tight fit on all types of guards (long slot)
- length and angle of lifter finger is fully adjustable to allow for optimal working conditions
- white color of lifter finger provides maximum visibility in all crop conditions
- high quality material ensures extended durability of the lifter finger

GUA17646

In comparison to other lifters, the Pro Flex lifter is much stronger and experienced longer wear along with less breakage on the finger. The simple adjustment, combined with the easy removal and mounting, reduces any unnecessary downtime.

This Pro Flex Crop Lifter from Schumacher is designed for all pulse crops. The fully adjustable lifter fits most guards. The replacement finger means you no longer need to replace the entire crop lifter. With the specially designed slot, the Pro Flex lifter can fit perfectly on most types of guards. That's why the Schumacher pulse lifter guarantees a tight fit. Suitable for those hard to fit fronts eg MacDon D60 and Case 2152. Ideal for all pulse crops.

### Fits All Makes

### Universal Grain Lifter

- Manufactured by European OEM manufacturer ensuring quality material and workmanship.
- Universal design fits most swather and combine applications up to and including 7/16" guard bolts
- The Grain Lifter is properly adjusted when the sliding surface is parallel to ground
- Too steep a Grain Lifter digs into the ground and is bound to break
- Too flat a Grain Lifter overruns the grain and does not serve the intended purpose
- Correct Grain Lifter position by adjusting distance at points shown, using suitable elements (e.g. nuts, washers, etc.)

**Note: Each hardware package is used to mount 25 Pro Flex Lifters**

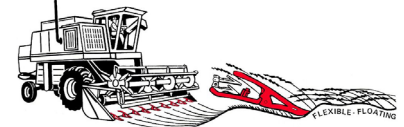

## Fits All Makes

## Gaterman Crop Lifter

Flexible Floating Pick-up Guards follow the uneven ground lifting up low hanging pods and grain heads above the cutterbar without the sickle guards digging into the ground and picking up stones. While automatic header controls, floating and flexible cutterbars have advantages over regular cutterbars, pick-up guards must be used to save all pods and grain heads in standing, row crop, lodged or windrowed crops. Gaterman pick-up guards fit all combines, windrowers and pea harvesters.

### No. 1A or 8A For Downward Tilting Cutterbars

Use No. 1A or 8A pick-up guards on combines having guards that tilt downward. The 8A is a fully adjustable crop lifter used on all windrowers and combines with fixed, floating, or flexible cutterbars that tilt downward. The 8A crop lifter is constructed of high strength ductile iron for durability and long service life. Plated grade 8 fasteners are used for high strength and corrosion resistance.

**Note:** The 8A crop lifter is used for 3" cut systems only. For 1½" cut systems, see the 4S crop lifter. For a more economical alternative, choose the 1A crop lifter.

This fully adjustable crop lifter is used extensively to harvest cereal crops (such as wheat, barley, oats, rye, and milo) on combines having sickle guards that tilt downward such as Allis Chalmers, Ford Class 622, Case III, Massey Ferguson, and New Idea flexible cutterbar.

GUA8A

### No. 8B Most Popular - Universal Fit

Use No. 8B pick-up guards on all windrowers, combines, floating and flexible cutterbars having sickle guards that stand level. The 8B is a fully adjustable crop lifter (also known as pick up guard) used on all windrowers and combines with fixed, floating, or flexible cutterbars. The 8B crop lifter is constructed of high strength ductile iron for durability and long service life. Plated grade 8 fasteners are used for high strength and corrosion resistance.

**Note:** The 8B crop lifter is used for 3" cut systems only. For 1½" cut systems, see the 4S crop lifter.

This crop lifter is used extensively to harvest cereal crops (such as wheat, barley, oats, rye, and milo) on all windrowers, combines, floating and flexible cutterbars having sickle guards that stand level, such as Case, Cockshut, Deere, Ford Claas, (except Model 622), Gleaner, Hiniker, Hart Carter, Case IH 820-830 flexible bars, Lovebar, New Holland, New Idea, (except Model 717 flexible bar), Oliver, Versatile, White, and Year-A-Round. Used on combines with automatic header controls such as IH Flexible Bar, Gleaner, Massey Ferguson, New Holland, White (made after 1982), Roper Wright, M&W, Kelley, Noble, and Vesco header controls. For use on John Deere 600 series flex head grain platforms, the installation kit, INST-8BF is required.

GUA8B

### No. 4S For 1½" Cut Systems

The No. 4S guard is designed to fit combines equipped with 1½" cut stub guards. Use this sturdy, field tested ductile iron guard to reduce harvesting loss of soybeans, rice, grain, and other seed crops. It has a set screw height adjustment, non-clogging spring action joint and is double bolted to the cutterbar. The 4S crop lifter is designed to fit combine floating cutterbars with 1½" cut stub guards such as Herschel Tiger Jaws, Case IH, Love, Kingkut, New Holland, White Kwik Cut, CFC, and others. It is used extensively in the harvest of pulse crops such as soybeans, peas, as well as other oilseed crops requiring high lift.

GUA4S

### No. 4H For Heavy Duty Applications

The 4H crop lifter fits windrowers and pea harvesters, as well as selected floating cutterbars used on combines. This sturdy ductile iron crop lifter is equipped with a set screw height adjustment and non-clogging spring action joint. It comes equipped with yellow zinc plated grade 8 fasteners.

The 4H crop lifter fits all windrowers and Love pea harvesters, as well as John Deere 600F, Hart Carter, Hiniker, Lovebar, and Year-A-Round floating cutterbars used on combines. It is used extensively in the harvest of pulse crops such as soybeans, peas, as well as other oilseed crops requiring high lift.

## Fits All Makes

## Mckay "Stubby" Crop Lifters

Designed specifically for peas, beans, and canola crops. These new lifters were designed to help farmers harvest the above crops, which are often difficult to pick up without shelling. Farmers asked us to make a short lifter that was built strong and was fast to put on or take off.

- Design and field tested to fit on most cutting platforms.
- Install or remove a set in minutes.
- Works well for all grain crops.
- Leaves stubble 1 ½" (series 150 ) or 2 ¼" (series 225)

### Note:

SL01 / SL01S lifters are for guards that are + 5.75" from center of bolt hole to tip of the guard.

SL02 / SL02S lifters are for guards that are + 4.8" long .

### Swing Lock Kit

With this swing lock feature, the crop lifter is secured with a hood and a spring steel tab that swings around a nut. The nut is designed to stay on permanently so a lifter can be easily installed and removed without the use of tools.

### Hardware

Westward Part#	Description
MCKSLH1	Swing Lock Crop Lifter Hardware
MCKSLH2	Crop Lifter Hardware (For MacDon FD70 & 2162)

### Note:

SLH1 Hardware kit must be used and attached to the cutter bar to accommodate installation of lifters.

**Stubby Lifters:** Rigid Header - Use 225 Series - EX SL01S225 / SL02S225 Flex Header - Use 150 Series - EX SL01S150 / SL02S150 Guards with 3/8" bolts - we recommend the use of grade 8 bolt.
